ABOUT

Business Intelligence student at IHEC Carthage, building things since I was 13, when I shipped my first Unity game. Today I run Kalori, a nutrition app for Tunisian food that I designed, built and operate alone, from the database to the AI that suggests meals, with 20+ people using it in testing. Sixteen months of full-time bilingual support at Concentrix taught me to listen to users before writing code; leading HEC Finance Academy's IT department taught me to deliver for 220 hackathon participants on a deadline. Looking for a 4–6 month final-year internship (PFE) from 02/2027 across data, AI and product.

EDUCATION

Bachelor in Business Intelligence – IHEC Carthage, Tunis — 09/2024 – 06/2027
3rd year · average 14.5/20 · graduation expected 06/2027

Baccalaureate in Computer Science – highest honours (mention Très bien) — 06/2024

PROJECTS

Kalori – Founder & sole developer · kalori-app.com — 06/2026 – present
Nutrition tracker built around Tunisian food (EN/FR/AR), in testing with 20+ active users

- **Built the AI meal suggestions:** a rules-based recommender and an LLM provider chain (Anthropic, OpenAI-compatible) with an output guard, fallback and per-call cost metering, over 106 Tunisian dishes, audited over 648 situations.
- **Developed the whole product alone** in 570+ commits: NestJS/TypeScript API, PostgreSQL, Redis, an offline React PWA, Firebase and Cloudflare.
- **Industrialised delivery:** GitHub Actions CI with 8 required checks and ~3,100 automated tests, blue/green deployment with automatic rollback.
- **Designing a data platform** (in progress): synthetic data, PostgreSQL on AWS RDS via Terraform, change data capture (Debezium, Kafka), a medallion lakehouse on Microsoft Fabric and Power BI, with a charter, risk register and ADRs.

BVMT Trading Assistant – Project manager, entrepreneurship competition — 2026
Intelligent trading assistant for the Tunis Stock Exchange (82 stocks), built on two validated prototypes

- **Data, forecasting and risk:** 2016–2026 price history cleaned into PostgreSQL, live scraping every 60 s; 5-day forecasts (LSTM, XGBoost, EMA) checked with ADF, AIC/BIC and backtests; anomaly alerts (Isolation Forest, 3σ volume spikes).
- **Portfolio and AI:** Markowitz optimisation with SHAP (Sharpe, VaR, stress tests), reinforcement learning, a 5-agent pipeline, LLM sentiment on French, Arabic and Tunizi news (GPT-4o, DeepSeek R1), RAG chatbot (ChromaDB, Llama 3.3).
- **Product and stack:** investor-profile sign-up, email alerts, scheduled reports, technical-indicator dashboard; FastAPI microservices, NestJS, Flask, TensorFlow, scikit-learn, Redis, Next.js, TypeScript, Recharts, Docker, n8n.

IHEC BOT – AI assistant for the university library (team project) — 02/2025

- **Led the chatbot:** Retrieval-Augmented Generation (RAG) with ChromaDB and Llama, and model fine-tuning.
- **Cleaned and structured 550+ catalogue records** (23 fields: titles, authors, ISBN, call numbers) before indexing.

EXPERIENCE

Technical Support Agent – Concentrix, Tunis (Lac 2) — 06/2025 – 09/2026

- **Diagnosed and resolved technical incidents** full time for French- and English-speaking clients.

Technical Lead – HEC Finance Academy (HECFA), IHEC Carthage · hecfa.com — 07/2025 – 10/2026
Student club · executive board, elected co-head of the IT department · member since 10/2024, alumni since 10/2026

- **Delivered 5 production apps for the CodeLab 2.0 hackathon** (220 participants, 12 teams) in Next.js, React and Firebase: registration and payments, participant tracking, support, jury scoring, ambassadors.
- **Built the club's recruitment platform:** application form and filtering dashboard, 321 applications processed.
- **Maintained and deployed hecfa.com** and its domain configuration as IT department co-lead.
- **Won 1st prize at Global Entrepreneurship Week** (IHEC, 11/2025): IHEC Connect prototype, 1,500 TND for the club.
- **Received a recognition certificate** for the CodeLab 1.0 hackathon (2025), as a member.

SKILLS

AI & Data Science: LLMs in production, Python, pandas, numpy, Streamlit, scikit-learn, RAG, ChromaDB, Llama, fine-tuning
Data Engineering: SQL, PySpark, ETL/ELT, CDC (Debezium, Kafka), medallion architecture, Microsoft Fabric, Power BI
Development: TypeScript, NestJS, Firebase Auth, JavaScript, Java, C#, PHP, React, Next.js, Git, Sentry, system design
Cloud & DevOps: AWS, Terraform (Infrastructure as Code), Docker, Podman, GitHub Actions (CI/CD), Cloudflare, Linux, n8n
Databases: PostgreSQL, Redis, MySQL, Oracle, Firebase

CERTIFICATIONS, LANGUAGES & INVOLVEMENT

Certifications: AWS Knowledge: Cloud Essentials (Amazon Web Services, 2026) · IBM Data Fundamentals (IBM, 2026)
Languages: Arabic (native) · French (B2) · English (C1), levels assessed in the Concentrix recruitment test
Involvement: Photography Lab, IHEC Carthage (10/2026 – present) · IEEE Computer Society, INSAT (2024–2025)
